

# CONTENTS

Abbreviations and transliteration	IX
1. Introduction	1
2. Syntactic variation	5
2.1 Functional-typological and formal approaches to variation	5
2.1.1 Early generative linguistics and variation	6
2.1.2 Parameters	7
2.1.3 The number and locus of parameters	8
2.2 The lexicon. Parameterization in Minimalism	9
2.2.1 The lexical turn	9
2.2.2 The Minimalist Program	11
2.2.3 Phase Theory. Uninterpretable features	12
2.3 Micro-comparative syntax and its impact on parametric theory	15
2.3.1 Micro-variation as an insight into the nature of language	17
2.3.2 Are there micro-parameters?	18
2.3.3 ‘Silent’ functional elements and functional hierarchies as the <i>locus</i> of variation. Kayne and the Cartographic Program	21
2.3.4 An overspecified grammar?	23
2.3.5 An alternative view: conceptual space and features as lexicalizations	24
2.4 Recent theories of parameterization	26
2.4.1 Interim summary: the core questions	26
2.4.2 Post-syntactic lexicon and PF-externalization (Boeckx 2010; 2011; 2012)	29
2.4.3 The format of parameters and possible grammars. Typological tendencies in Roberts and Holmberg’s approach	33
2.4.3.1 Markedness and options	34
2.4.3.2 Building macro-parameters	38
2.4.3.3 The number of possible grammars (and some problems in Roberts and Holmberg (2010))	40
2.4.4 A case of variation	44

3. Theoretical questions: subjecthood, EPP requirement and the NR constructions	45
3.1 Problems for current generative approaches: the research questions	45
3.2 The Extended Projection Principle	47
3.2.1 From <i>Principle P</i> to the EPP	47
3.2.2 Two kinds of EPP	49
3.2.3 Is the EPP-requirement universal?	50
3.3 Null subjects	52
3.3.1 The Null Subject Parameter	52
3.3.2 Minimalist approaches	60
3.3.2.1 The deletion approach. The D-feature in T	63
3.3.2.2 Alexiadou and Anagnostopoulou (1998)	67
3.4 Concluding remarks	71
4. The -n(o)/-t(o) constructions in North Russian dialects	77
4.1 Areal distribution	77
4.2 Morpho-syntactic features	79
4.2.1 Past passive participles in standard Russian	79
4.2.2 The past passive participle in the dialects: distinctive features of NR 'perfect' constructions	82
4.3 Previous analyses of participial constructions in NR	90
4.3.1 Partial demotion of the subject	91
4.3.2 Voice alternations	92
4.3.3 Quirky case and the EPP requirement in Lavine (1999; 2000)	93
4.3.4 Morphological ergativity and split <i>v</i> structure. Tsedryk (2006)	96
4.3.5 The <i>be/have</i> parameter: little- <i>v/n</i> structures (Jung 2007; 2009)	100
4.4 Remarks on previous proposals on NR participial constructions	103
5. The morpho-syntax of participial constructions in NR	109
5.1 The framework	109
5.1.1 Morphology as syntax	109
5.1.2 The EPP and the basic clause structure	110
5.1.3 Movement and agreement	113
5.2 Proposal	114
5.2.1 Morphological analysis.	115
5.2.2 How it works	116
5.2.3 The neuter ending -o: <i>no</i> -dialects	119
5.2.3.1 Further evidence: auxiliaries as existentials	121
5.2.4 Participles with zero inflection: the <i>n</i> -dialects	124
5.2.4.1 The participial construction with intransitive verbs	125
5.2.5 The agreeing pattern	129
5.2.5.1 Lexicalization of nominal class properties in the participle	132
5.2.6 The external argument	135

5.2.6.1 The properties of the u-phrase	137
5.2.7 The accusative configuration	143
5.2.7.1 Cross-linguistic facts	144
5.2.7.2 Preliminary discussion	146
5.2.7.3 'Dependent' case	147
5.2.7.4 The -o element as an argumental position	148
6. Conclusion	151
6.1 Further parametric effects: the Generalization of the Input in NR	151
6.2 Summary: parametric differences within NR varieties and with CSR	154
6.3 Final remarks	156
